User Story : US05_DisplayData / Frontend

1 story points = half day of work / 2 persons

Name :	US05_displayData+Website	Size :	Priority :
Story : As a user, I want a visualization to see whether someone pressed his/her button by displaying the website			
<ul style="list-style-type: none"> - Database design (erd) (entry (id, timestamp), device(id), participant(id, name, email, password)) Test : Let it be checked by multiple people	1		
<ul style="list-style-type: none"> - Implement database by using an sql script created with mysql workbench for example Test : Tables of design are accessible by code :	1		
<ul style="list-style-type: none"> - Make GUI design Test : Let it be checked by multiple people	2		
<ul style="list-style-type: none"> - Implement GUI design Test : Website displays the gui that was designed	2		
<ul style="list-style-type: none"> - Create a login page (email, password) Test : The page displays the correct fields	1		
<ul style="list-style-type: none"> - Login handler Test : The user is logged in when the correct information has been given. If false information is given notify user.	1		

<ul style="list-style-type: none"> - Create a register page (name, email, password, retype password) <p>Test : The page displays the correct fields</p>	1	
<ul style="list-style-type: none"> - Register handler <p>Test : The user creates a database record. When fields are incorrect notify user</p>	1	
<ul style="list-style-type: none"> - Create device linking page (link participant with device) <p>Test : The page displays the correct fields</p>	1	
<ul style="list-style-type: none"> - Device linking handler <p>Test :A relation is created in the database between the device and the logged in user (participant).</p>	1	
<ul style="list-style-type: none"> - Homepage that displays whether someone is there instead of just timestamps <p>Test : The page displays the logged in user and whether he is online or not. :</p>	1	
<ul style="list-style-type: none"> - We need to register a domain name, talk about how we can get one and which name is should be used <p>Test :The page is accessible through the domain name</p>	1
